Volunteer Program

We have a strong association with Beijing **NGOs and charities** and are keen promoters of **sustainable development** and migrant family aid. Our all-inclusive Volunteer Program is designed for devoted candidates who wish to combine volunteering at an NGO and joining NGO-focused cultural activities in and around Beijing.

Our Program offers students the opportunity to work in associations involved in environmental protection or corporate social responsibility (CSR), and help local communities who really need their help.

Intensive Chinese Program

The Intensive Chinese Programme is aimed at students with a profound interest in learning Chinese.

Innovative teaching method

Specially adapted to the specific needs of every student, our teaching method, separating spoken Chinese and character recognition, has been proven to expedite Chinese language learning. While **progressing quicker** in spoken Chinese, students also lay better foundations for character memorisation by **understanding the logic** of characters' construction.

Personalised approach in Chinese Learning

Because personalised teaching is the key to fast and efficient results, we at Hutong School believe in **one-on-one level assessment**, a study plan and small classes to learn Chinese with an average of 4 or 5 students.

Guaranteed results

Our **result-oriented method** guarantees fast improvements. In only 3 months time, students are able to engage in basic conversation in Chinese and recognise about 600 characters.
