## **Our Mission**

Elective Africa facilitates medical student elective placements abroad. For over 10 years we have been working with community health centers and teaching hospitals in Africa, to provide medical students with a rare opportunity for hands-on learning experience, cultural exchange, and medical volunteering in Africa.

We organize placements for Medical, Nursing and Midwifery students as well as medical camps for volunteer doctors. Placements range from Internal Medicine, Obstetrics and Gynecology, Pediatrics, Dentistry, Radiology, Surgery and Emergency care among others.

We currently run programs in Kenya, Tanzania, Zambia and Malawi.

## **Our Locations**

We have operations in four main countries

- Kenya is the bedrock of our program and we have been operating in Kenya for over 10 years. Our partnerships and strength of relationships in Kenya are second to none and we can quickly place students in any region. We have relationships with 15 hospitals and have several doctors advising our program, supervising and evaluating our placements. Kenya serves as the regional hub for our programs in Africa with support staff coordinating operational activities.
- Malawi is the latest addition to our programs where we have established relationships with Missionary Hospitals and teaching hospitals in the country. It offers an excellent opportunity for those seeking to advance their knowledge in rural medicine and community health.
- Zambia mainly attracts students from Europe and USA with placements concentrated in the populous Copperbelt and Lusaka regions of the country. Our partners are on hand to work with participants to ensure they meet their placement objectives.
- Tanzania is the newest of our programs where we have developing relationships with hospitals in Arusha and Dar es Salaam

## **Our Offices**

Our main offices are in Mombasa, Kenya where we manage most of our operations. We also have offices in Nairobi and satellite offices in the US.

### **Mombasa, Kenya**

Lantana Drive, Links Road Nyali  
Mombasa, Kenya.  
P. O. Box, 40195-80100

### **Nairobi, Kenya**

Machera court, D4, Komo Lane  
Wood Avenue, Kilimani  
P. O. Box 100158  
(00101) Jamia, Nairobi-Kenya

### **United States**

30 Lockwood Drive  
Princeton, NJ 08540  
United States  
Tel: (609) 643 0188

## From the Program Manager

### Welcome

Welcome to Elective Africa. For over 10 years, we have organized electives for medical students in Kenya and recently expanded to include more African countries. We are committed to ensuring our program meets the following broad hurdles

- Offering a rich, rare and insightful learning experience
- Focusing on underserved communities in Africa
- Facilitating cultural exchange and appreciation of host country communities and cultures
- Providing the time and space for reflection, inspiration and fun

Placement on the program is driven by individual skills, interests and the ability to contribute to host community hospitals. In the past, our electives have drawn participants from various backgrounds that include:

- Senior medical students – students in the second half of their medical school education
- Junior medical students – students in the first half of their medical school education
- Nursing students – nursing and midwifery students
- Premedical students – students aspiring to join medical schools
- Medical camps – qualified healthcare professionals looking for volunteer or meaningful travel experience
- Public health researchers – students and professionals doing research in the health field
- Others – this includes categories of students interested in the healthcare field such as paramedics and health sciences

## Our Commitment

Once you enroll on the program we offer to provide a structured elective experience, an opportunity for a hand-on learning experience in a different healthcare setting handling a variety of health cases including tropical diseases, a safe and secure accommodation, an opportunity for travel and cultural exchange.

As with any worthwhile endeavor, elective placements in developing countries come with their own challenges. We would be remiss not to discuss the ethical tensions of practicing medicine in developing countries. These range from working in resource constrained settings with high patient loads to encountering medical complications that are a result of unsuccessful traditional healing practices. This is an opportunity for students and physicians to apply their knowledge and apply suitable medical interventions to save lives.

Whatever your needs: medical elective, meaningful travel or volunteering, we will go the extra mile to ensure you have a memorable learning experience and also some fun!

Sincerely,

A handwritten signature in black ink, appearing to read 'Lillian Mugonyi-Nasser', written in a cursive style.

Lillian Mugonyi-Nasser  
Program Development Manager

## General Program Information

<b>Locations:</b>	Kenya, Malawi, Tanzania, and Zambia
<b>Duration:</b>	Ideally 4 weeks
<b>Start Dates:</b>	Usually the first Monday of every month
<b>Team Sizes:</b>	Groups are typically 6 in size
<b>Accommodation:</b>	Accommodation is basic, shared rooms, but very comfortable in Elective Africa houses, which are located in very secure neighborhoods  However, we do consider individual preferences and home stay on requests
<b>Participation Requirement:</b>	Demonstrated interest in the medical field
<b>Supervision, Preceptorship &amp; Evaluation:</b>	Supervision and preceptorship is under an experienced and certified professional  Evaluation can be either Elective Africa's own program evaluation, or based on requirements of participant's school

## **Program Overview**

Our programs are conducted in four countries: Kenya, Tanzania, Zambia and Malawi.

We organize placements for the following groups.

- Students: Premedical, Medical, Nursing and Midwifery, and Dentistry
- Medical camps for volunteers
- Medical Research

Placements typically last from 4-6 weeks. At the end of the program, students are taken on safari to the famous Maasai Mara game reserve while in Kenya or to other scenic destinations in Tanzania, Zambia or Malawi.

## **Students**

Over the last ten years, we have successfully placed students from USA, Canada, Australia, UK at several health facilities on the program. Students attending our programs have mainly been medical or nursing students seeking elective placement. However, we also have considerable number of premedical students attending our programs as a means to gaining exposure to the medical field or even demonstrating serious intentions to join medical school and the medical field.

## **Premedical Students**

This program is designed for students who are considering enrolment in medical schools and colleges. The program gives aspiring medical students an opportunity to experience and learn firsthand the intricacies of becoming a medical doctor. The students gain exposure to various medical fields including: Clinical medicine, obstetrics & gynecology, pediatrics, emergency medicine, general and orthopedic surgery, E.N.T, ophthalmology and radiology. Students participate in ward rotations, observe the supervising doctors and draw an understanding of diverse aspects relating to patient care.

## **Medical / Nursing Students**

Once enrolled on the program, medical and nursing students are involved in daily ward rounds between 8:00am-1pm Monday to Friday; they also get involved in bedside procedures under supervision. They are placed in various units depending on their areas of interest ranging from:

- Internal Medicine: Infectious diseases, Gastroenterology, General Internal medicine consultation, Hematology and Neurology
- Obstetrics and Gynecology
- Pediatrics
- Dentistry
- Radiology
- Surgery
- Emergency care

## **Supervision and Evaluation**

Students are supervised by full time and certified physicians and participate in all aspects of patient care. This gives them an opportunity to refine their skills in history taking, physical exams, and procedural skills. They are also involved in patient admissions, clinical decisions concerning patient care as well as patient discharge. At the end of the placement, their supervisor writes an evaluation report on their performance. The report is either based on Elective Africa format or in a participating schools' evaluation format. See page 25 for our supervision and evaluation form.

## **Volunteer Medical Camps**

Qualified doctors from all medical backgrounds participate in this program. We identify health facilities where they are placed and use their skills to improve the quality of health care especially in rural and underserved communities. Visiting doctors are welcome to bring their families if they wish to take a holiday after the program. Special arrangements can be made for those wishing to pursue this option.

## **Public Health / Medical Research**

We partner with medical research institutions to provide researchers with an opportunity to use their skills and contribute to groundbreaking research.

## **Partnerships**

Elective Africa works in partnership with various public and private organizations and Institutions. These range from medical colleges, teaching hospitals and regional hospitals among others. Our program advisors are college professors and medical consultants at various health facilities. Some of our placement partners include:

- Kenyatta National Teaching Hospital, Nairobi, Kenya
- University of Nairobi
- Coast General Hospital, Mombasa, Kenya
- Moi Teaching and Referral Hospital, Eldoret, Kenya
- Muhimbili Hospital, Dar-es- Salaam, Tanzania
- University Teaching Hospital, Zambia

- Queen Elizabeth Hospital, Malawi
- Kenya Medical Research Institute, KEMRI
- Port Reitz Hospital, Mombasa, Kenya

For anyone who has spent time trying to navigate public institutions in the developing world, this can be a very challenging experience. We have developed strong relationships and networks with these hospitals and are also familiar with the healthcare and educational systems in the western countries. We are therefore uniquely positioned to facilitate medical electives, camps and projects for anyone looking to Africa as a destination.

## Program Advisors

**Prof. Joseph G Karanja** is an Associate Professor of Obstetrics and Gynecology at the University of Nairobi in Kenya. He is a consultant Obstetrician and Gynecologist at all major hospitals in Kenya including Nairobi and Aga Khan Hospitals. He is the current president of the East Central Southern Africa Obstetrics and Gynecology Society (ECSAOGS) and the ECSA regional coordinator of the FIGO committee on prevention of unsafe abortion.

**Dr. Edgar Kuchingale** is a specialist doctor at Mwaiwathu private hospital in Blantyre, Malawi and a clinical lecturer at the University Of Malawi College Of Medicine. He has worked at various government and faith based health facilities including the Blantyre Adventist Hospital. He has held various positions in the Ministry of health and was previously a District Health Officer heading a district health management team.

**Dr. Paul Nyangasi Oduwo** is a surgeon and the medical superintendent at Tudor District Hospital and formerly the Medical Officer at Port Reitz District Hospital in Mombasa. He is a consultant at the Pandya Hospital in Mombasa in the outpatient and Casualty units.

## Placement Requirements

- Students must show evidence of enrollment in a nursing / medical program
- For medical camps Doctors must show proof of medical qualification e.g certificates of qualification or copies of practitioners' license
- A letter from the school/college showing they are bona fide students at that institution
- Duly completed online application form
- A non refundable deposit of \$300 that is deductible from the total program fee

- Full payment of program fee 3 (three) months prior to starting the program
- Must be at least 18 years of age
- Premedical and post baccalaureate student applications are considered on a case by case basis.

## **Logistics**

We undertake all logistical arrangements once a deposit of \$300 has been made. This includes getting clearance from the government to allow the student to participate on the program as well as obtaining admission letters for placement to the respective health facilities. The balance of payment is due for settlement 3 (three) months prior to starting the program.

## **Travel**

While students and visiting doctors make their own travel arrangements from their respective countries, we organize local travel from the moment students arrive in the country. This includes airport pick up, daily transportation to the health facilities as well as a trip to the Maasai Mara game reserve or any other attraction that the students may opt for in their country of choice. Students are advised to send copies of their travel itinerary as well as copies of their passports to Elective Africa in advance. Entry visa applications can be made at the immigration desk at the airport or from the respective embassies in the home country prior to travelling. An entry visa costs approximately \$50 and is payable in cash at the immigration desk. Checks, credit or debit cards are not accepted. Students are advised to purchase comprehensive travel insurance that will cover medical evacuation and or repatriation to the country of origin.

## **Accommodation**

We provide accommodation at a shared housing facility that accommodates 6-8 students. The housing facility is gated and fenced to enhance security and is under 24/ 7 security surveillance. In some cases we also organize home stays where students live with local residents. This is an opportunity to interact with local communities and learn a new way of life, language and culture. Bed linen and mosquito nets are provided. Guests are required to bring their own towels. Laundry services are provided but students are required to wash their personal clothing. However, if one needs their clothes washed, an independent hand-washing and line-drying laundry service is available on site at a

negotiated fee.

For doctors coming on the medical camp program, alternative accommodation arrangements can be made for private accommodation at their own cost.

## **Food**

Participants are provided with two meals per day, breakfast and dinner, and snacks are available all day. There is always food in the fridge and a microwave for the days when a participant is in the house during lunch hours. We also have ample supply of cold cuts and fixings for sandwiches. The house is always stocked with breakfast items – bread, eggs, coffee, tea, milk, cereal, fruits – for students to fix their own breakfast. For dinner, a chef prepares and serves a meal daily. The menu has variety to accommodate all kinds of preferences – meats, vegetables, rice, pasta, grains – with a touch of local cuisine. The chef is always open to suggestions and will readily accommodate all reasonable requests. There are several eateries where students can visit at their own expense whenever they want to eat out. Several fast food restaurants also deliver western style burgers and pizzas. Students with special dietary needs (allergies, lactose intolerance, diabetes, vegetarian) are advised to inform their coordinator well in advance for special arrangements to be made.

Depending on the housing set up, there will be a BBQ on the first and last Friday of the month. These BBQs also double up as welcome and farewell dinners for the incoming and outgoing groups, respectively.

## The Safari

*Wildebeests in the Maasai Mara*

We offer all our participants an opportunity to join their colleagues on a Safari to the world famous Masai Mara, for those whose placements are in Kenya. In the rare occasion where participants do not fill a van, participants will go on Safari with other travelers. Going on a safari organized by us will be substantially cheaper than organizing a safari yourself. The safari is offered at cost to our participants, with no mark-up.

For a supplement of USD 200.00, we offer a group of participants the following:

- A tour van with roof top viewing
- All transportation costs to and from the game reserve
- An experienced English speaking driver guide
- Accommodation for two nights in a two people shared camp in the game reserve
- Food while on the two day safari in the game reserve

The participant will be responsible for the following:

- Park entry fees for the safari – USD 60 per day, totaling USD 120 for the two nights
- All food and drinks after leaving our housing facility and before entering the game reserve. And all food and drinks after leaving the game reserve and before returning our housing facility
- Any overnight accommodation needed after leaving the housing facility and before entering the game reserve, and any overnight accommodation needed after leaving the game reserve and before returning to the housing facility. Participants are free to choose whatever type of accommodation they want, but we typically recommend a

value hotel that is very safe and clean, and costs about USD 23 per night. So if you do spend a night in Nairobi before and after the safari, this will add up to USD 46.

*Students on safari in the Maasai Mara*

## **Other Attractions**

For students on placement in other countries: Tanzania, Zambia or Malawi, there are various attractions to visit for example a visit to Zanzibar, a visit to the famous Lake Malawi or a visit to the Victoria falls (Livingstone) in Zambia. The options in these countries may vary depending on the season, please confirm with your coordinator.

## **Student Checklist**

- Up to date immunizations including yellow fever – please see your physician for advice
- Malaria prophylaxis is strongly recommended
- A valid visa that will allow one entry into the country- can be obtained at the port of entry
- A valid passport for at least six months from the date of arrival
- A return air ticket
- Comprehensive travel Insurance

- White coat / Scrubs
- Stethoscope
- Spotlight
- Towel
- Insect repellent
- Sunscreen
- Toiletries
- Power adapter
- Hairdryers and shavers
- Hat
- Sunglasses
- Hand sanitizer

## Testimonials

*Cassanne Eccleston, Charles Sturt University Australia, August, 2010*

“Doing a medical elective in Kenya was an eye opening experience. I got to see the developing world health system and range of tropical diseases not normally prevalent in Australia. I got to learn and perform skills like administering injections, catheters and suturing patients. I was also able to take part in the examining, differentials, diagnosing and formulating treatment plans. The highlight for me would have to be the amazing new friends I have made and the motivation I have taken back home. I would recommend this program to anyone considering it.”

*Ida W. Bjorntvedt, Oslo, Norway, August, 2010*

“Elective Africa is a highly educative program for all medical students. If you have special interests in fields like Obstetrics/gyn, general surgery and tropical medicine this is a very good program. The experience I had in Mombasa has been memorable and I highly recommend Elective Africa to everyone who is considering applying.”

*Michelle Carey, Leigh-on-Sea, UK, August, 2010*

“I want to say I think it is a fantastic program ...I did the senior program so what I wanted out of an African elective program was plenty of hands on experience and to get the opportunity to see tropical / unusual diseases we would not see in the UK. And I got both of these. Coast is a brilliant hospital to be placed at. It probably helps that it is a teaching hospital, so many Kenyan students were there too, but it means you get taught by knowledgeable, enthusiastic and relevant staff.”

*Drew Hulse, Kansas, United States, July, 2010*

“Overall the experience I’ve had in Mombasa and with the other students has been memorable. I have made some great new friends and will hopefully be able to visit them when we all return back to the states.”

*Jennifer Bess , MD , United States , July 1, 2010*

“Once again, thanks so much for all you do. I had a wonderful, enriching experience and look forward to folding what I learned into my courses.”

*Natalie & Ingvild , Warsaw , Poland , July 1, 2010*

“Our first week at the hospital is completed. It has been a week I will definitely remember for the rest of my life, both in good and bad ways. Just after this first week, we have learned so much that it feels like we have been here much longer.”

## **Frequently Asked Questions**

### **What Medical Advice do I need?**

Students should get the latest medical advice on inoculations and malaria prevention before coming to Kenya. Malaria risk exists all year round. Immunization against yellow fever, polio and typhoid are usually recommended, but please consult your physician prior to travel

### **Is it safe to volunteer in Africa?**

One of the key reasons for using Elective Africa to facilitate and organize your elective or volunteering in Africa is that we take all measures to ensure your safety abroad. African people are friendly and warm towards foreigners.

### **Do you cater for groups or other specialist volunteers such as professionals?**

Yes we do. All of our programs are suitable for groups or individuals. We can also tailor the program to suit group or individual preferences. So whether you are a corporate group, a researcher or a student seeking to volunteer in a specific area, we will design a program that will meet your specific requirements.

### **Can I do more than one placement?**

Yes you can. This is especially so for volunteers on the Gap Year and Internship program or those who would like to volunteer for more than 3 months.

### **What happens when we first arrive?**

This depends on your arrival airport. Our representative will be on hand to meet you, participants are advised to send their travel itinerary to Elective Africa ahead of time.

### **What if I have a domestic connecting flight?**

Participants are advised to go through immigration and then pick their luggage and proceed to the domestic departures for their connecting flights.

## **What if I arrive in the night and need to travel to another city for my placement?**

We have specific hotels where we take our participants for overnight stays. Our representative will be on hand to pick you and check you into the hotel. If students have to proceed on a long bus journey we recommend a two nights stay to allow for enough rest after a long flight.

## **Where will I stay?**

Our volunteers typically live in a shared student house and upon request with a Kenyan host family. Most students prefer to stay at the shared house as this gives them an opportunity to interact and meet new friends. The home stays on the other hand offer an opportunity to learn more about African communities and cultures. We make efforts whenever possible to accommodate specific requests that a volunteer may have with regards to their preferred accommodation.

## **Do I have to speak the local languages?**

No you do not. You will get along extremely well with just English. However, it is helpful to learn some basic words and phrases commonly used. This will be covered during the training and orientation program.

## **Tell me about African food.**

Foods served during your placement period include traditional African meals like ugali and sukuma wiki (corn meal and collard greens), githeri (maize and beans), irio as well as chapattis (flat bread). African meals also consist of other universal dishes such as beef, chicken, fish, rice and pasta. Breakfast usually consists of bread, eggs and tea. Fruits and vegetables are plenty in Africa and feature frequently in menu preparations. Locally grown coffee and tea are common beverages.

## **Is it safe to drink tap water in Africa?**

No. It is generally recommended that you drink bottled water during your stay. You can buy bottled water from any supermarket and most shops. The most common water-borne diseases in Africa are typhoid, cholera, amoebiasis and dysentery. We have a constant supply of bottled clean water in the water cooler in our student housing.

## **How can I communicate with home when abroad?**

Local sim cards can be readily purchased for your mobile phones upon arrival. Alternatively, there are several internet cafes around town where you can get internet access.

## **Is it possible to stay longer?**

Yes. We can normally increase time at a project, and accommodation at short notice. You must, however, be aware that a longer stay may necessitate a visa extension and extra costs.

## **What's not included in the price?**

Domestic flights, insurance and costs of getting your visa are not included. Additionally, if you choose the Safari supplement, the park entrance fee, meals to and from the safari and any overnight stays before or after the safari are not included in your trip. The safari supplement includes only the following:

Full cost of transportation by van to and from the game reserve

Two nights' accommodation and food while on the actual safari in the game reserve

A driver guide and van

## **How do I get a Visa?**

Visas can be obtained on arrival at the Airport. All foreigners require a passport and a visa to enter the country.

**Visa Note:** Visas can be obtained by most nationalities on arrival for a fee of US\$50.00 which is valid for a period of three months and must be paid in a convertible currency. We however strongly encourage our volunteers to obtain their visas before they depart from their country as it is more convenient and saves time.

## **When is my placement fully confirmed?**

Once you have paid a reservation deposit of \$300 (non-refundable, but can always be credited to your placement account whenever you decide to come for any of our programs). When possible, final payment should be made in full at least 3 months prior

to your arrival for your program. A lot of work is done prior to your arrival – arranging airport pick up, securing your accommodation, getting any required hospital, regulatory or government permits.

### **What clothes will i use in the Hospital?**

Medical or Pre Medical Students are required to come with their Lab Coats or Scrubs.

### **Can i use my credit card on Arrival?**

There are several bank ATM facilities that accept all major credit cards (Visa, Mastercard.) these are found at the Airport or at various locations across Town.

### **What if I am vegetarian?**

We offer a wide food variety that caters even for vegetarians. We just need to know your special needs in advance.

### **Where can I go shopping?**

There are various shopping outlets with a selection of shopping malls and/ supermarkets that will cater for most of your shopping needs. While out shopping, do not wear expensive clothing and excessive jewelry. Avoid dark or isolated alleys and always take a taxi after dark. Do not carry a lot of cash on you that may attract petty theft. It is however safe to shop in most parts of the city. We shall recommend and guide you regarding appropriate areas to shop and visit during your placement.

### **What other safety issues should I be aware of?**

Due to the poverty levels in the developing world, you are likely to be more fortunate than most local people you meet. You will probably attract souvenir hawkers as well as street children and beggars in smaller towns. Be sure to take some precautions such as:

- Have a copy of your passport and keep it in your luggage.
- Do not walk on your own at night in the major cities.
- Do not wear excessive or expensive jewelry.
- Do not carry a lot of cash with you.
- Limit the gadgets you carry with you: a small camera, phone, iPod

- Wear a money belt that fits under your clothes.
- More safety issues will be discussed during your orientation.

## **What clothing is appropriate?**

Bring along some comfortable, casual and semi-casual clothing such as sweat shirts, shorts, jeans, skirts and any other clothing that you would ordinarily wear. Include warm clothing for cold nights, especially if you volunteer in the rainy season (April to May) or the cold season (June and July).

When out in the community, it is good to follow local etiquette. Dressing in the cities is quite liberal. However, approach it with cultural sensitivity in mind and you will be fine. Avoid excessively flashy or revealing items. Please ask when you are not sure on what is appropriate.

Bring comfortable walking shoes such as sports shoes. It is also advised to carry a pair of open-toed sandals, especially for those who will be volunteering in the hot season (December to February; August to September). Carry a few smart outfits for special occasions that you might be part of e.g. dinners or parties.

## **What do I need to pack?**

Volunteers need to bring their own towels, toiletries and other personal effects. Please note that volunteers are responsible for their own laundry. It is safe to bring your hair dryers, shavers and other electrical products.

Other suggested items:

- Malaria tablets; consult your doctor
- Adapter plugs and converters for electrical appliances
- Moisturizing cream and sunscreen lotion
- Insect repellent (e.g. Tabard, Rid, Jungle Juice, OFF, etc.)
- Basic medical kit (e.g. aspirins, band aids, Imodium, antiseptic cream, and anti-histamine cream, etc.)
- A journal to document your experience

## **What about the electricity supply for laptops, hairdryers etc?**

The electricity supply in Kenya is 220/240 volts/50 Hz (240V 50 Hz D & G). The electric sockets are three-pin square. Countries with different voltages and frequencies will need a power converter. It is important to check this as incorrect use may damage your equipment. Check your electrical equipment to see if you will need a power converter and/or a plug adapter. Volunteers may purchase power converters in their home countries or on arrival. For plug adapters, these are widely available in shops and supermarkets all over the country. We advise volunteers to purchase them after arrival in the country and after confirming what type of sockets they have in their accommodation.

## Elective Evaluation Form

**NOTE:** Emphasis on supervision and evaluation is a key differentiator and credibility factor for Elective Africa as a facilitator of electives. Every participant, depending on their program, is evaluated by the supervising physician or nurse under whose supervision they worked. We use this form as our generic evaluation form. However, given that each school has its own unique needs, we prefer that students bring their own evaluation forms or have them emailed to us at [info@electiveafrica.com](mailto:info@electiveafrica.com) so that we complete and mail them back.
